

Capitum's CORPORATE ECONOMIST

Capitum's CORPORATE ECONOMIST provides fact-based analytics on finance, processes and people performance of your company and those of your peers. This regular report helps each Member of the Board to gain full transparency on your company's performance and productivity and therefore supports better and faster decision making. Many Directors already take advantage of Capitum's CORPORATE ECONOMIST and use it on a regular basis at Board Meetings.

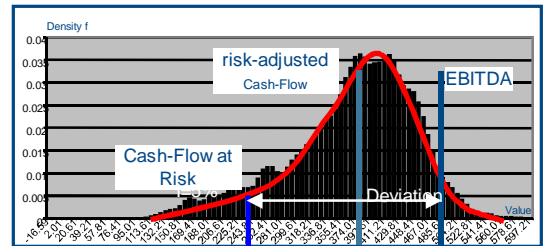

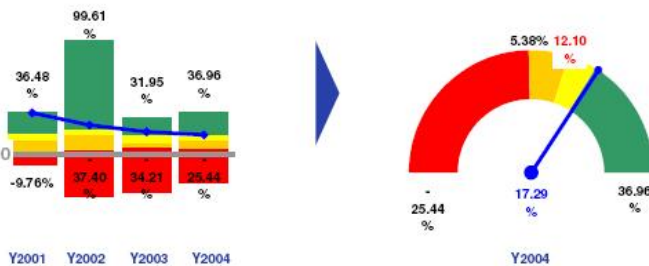

CORPORATE ECONOMIC PERFORMANCE

Company Performance provides you with general information on the balance sheet, income statement, capital market performance, as well as further analysis of people and process performance. Additionally, it consists of a company risk analysis highlighting some of the main risk figures within a company.

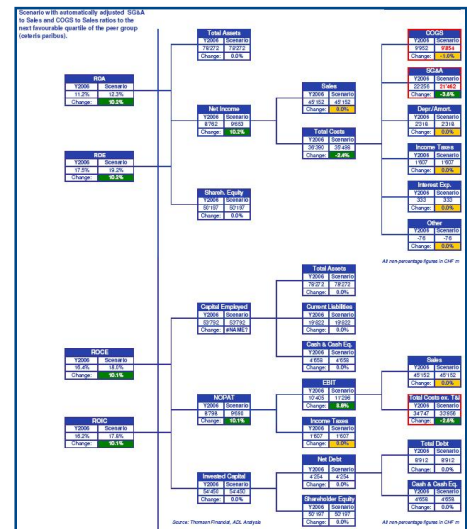

PEER ECONOMIC PERFORMANCE

In part *Peer Economic Performance*, company performance will be compared to a broader or narrower peer group in terms of capital market performance, financial performance, process performance and people performance. Risk and Opportunity Analysis is an additional feature.

CORPORATE ECONOMIC SCENARIO

The *Corporate Economic Scenario* allows you to comprehensively and systematically analyse and think through certain strategic or operative steps before executing them. Better test alternative management scenarios and key performance indicators first and then reach your decision.
